Wittner M, Di Stefano A, Wangemann P, Nitschke R, Greger R, Bailly C, Amiel C, Roinel N, De Rouffignac C: Differential effects of ADH on sodium, chloride, potassium, calcium and magnesium transport in cortical and medullary thick ascending limbs of mouse nephron 516

Yamaguchi K → Ohya Y et al. 382
Yoshida S → McNiven AI et al. 451
Yoshitomi K → Imai M et al. 557

Young AA, Dawson NJ: Effects of environmental temperature on the development of a noradrenergic thermoregulatory mechanism in the rat 141

Zeh R → Lückhoff A et al. 654
Zeisberger E, Roth J, Simon E: Changes in water balance and in release of arginine vasopressin during thermal adaptation in guinea-pigs 285
Zeisberger E → Cooper KE et al. 292
Zimniak P → Montrose MH et al. 164
Zwiener U → Witte H et al. 442

Subject index

Abdominal myotomes 524
Acetazolamide 1
Acetylcholine 240
Acetylcholine 240
Acetylcholine 462
Acetylcholine 509
Acetylcholine (ACh)-quanta 22
Acetylcholine quanta 258
Acetylcholine receptor channel 211
Acetylcholine-receptor 22
Action potentials 530
Activation 634
Active vasodilatation 106
Acute exercise 101
ADP 455
Adenine nucleotides 121
Adenosine 618
– release 106
Adenylate cyclase 363
Adrenaline 258
Aequorin 195
AGE-related changes 665
Alanine 7
Alkaline phosphatase inhibition 482
Alkalinization 369, 613
Alpha-adrenergic receptor 75
Amiloride 80, 568
Ammonium chloride 503
Amphibian skin 305
ANP providing system 535
Anabolic processes 397
Anaerobic metabolism 121
Analogues of diaclyglycerol 462
Angiotensin 574
Angiotensin II 448
Angiotensin II antagonist 448
Anion transport 305
Anisotropy 147
Anterior hypothalamus 141
Antibiotics nonactin/monactin 359
Antidiuretic hormone 42
Antipyresis 292
Aortic cell 448
– endothelium cells 469
– valve 647
Apamin 422
Apical membrane 568
– – voltage 634
Aplysia neurone 240
Arginine vasopressin 285, 292
Ascending limb of Henle's loop 516
Aspartate aminotransferase 417
ATP 331, 469, 654, 665
– concentration 455
ATP^{4-} 37
ATP · Mg 37
ATP-sensitive ion channels 297
– K^+ channel 37
Atrial natriuretic peptide 535
Auditory cortex 12
– stimuli 12
Autonomic nervous system 128
AV block 618
Azelainylcholine 211
A10 cell line 29

B

BAY K 8644 597
Ba^{2+} 422
Ba^{2+} 497
Ba^{2+} currents 597
Balb/c 3T3 fibroblasts 530
Barium 1, 369
Bicarbonate 1, 369
Bile acids 164
Biorhythmus 442
Blood flow 106
– rheology 93
– volume 354
Body temperature 292
Bradycardia 618
Bradykinin 654
Brain neurons 292
Brom 305
Brush border membrane transport 482
2,3-Butanedione monoxime (BDM) 659

C

Ca action potential 451
Ca release 382
Ca uptake 211
Ca^{2+} 530
Ca^{2+}-activated contractions 225
– K channels 548
Ca^{2+}-activated K^+ channels 422
Ca^{2+} channel(s) 390, 597
Ca^{2+}-current 554
Ca^{2+}-Dependent potassium 469
Ca^{2+} ions 339
"Ca^{2+}-jumps" 231
Ca^{2+}-mediated K conductance 451
Ca^{2+} release 451
Ca^{2+} transients 195
$^{45}Ca^{2+}$ transport 277
Ca-channel currents 668
Ca-channels 668
Ca-dependent channels 462
– protease calpain 554
Caffeine contracture 390
Caffeine-sensitive calcium store 376
Calcium 75, 164
Calcium, internal 641
– channels 328
– concentration 503
– current 248
– on renin release 503
– sensitivity 253, 331
– store 376
– uptake 211
Calcium-activated K-channels 331
Calcium-dependent K^+ channel 469
Calmodulin antagonists 253
Calpain I/II 554
Calpastatin 554
cAMP 54, 568
Capacity transients 445
Capillary 93
Captopril 574
Carbon dioxide 183
Carboxylation 7
"Cardiac aliasing" 442
– calcium channels 328
– cycle 647
– muscle cell 248
myocyte(s) 248, 328
– output 548
Cardiorespiratory reflex responses 113
– reflexes 113
Cations 211
Ca-transport, renal 516
CDPC 568
Cell cations 497
– electrolyte concentrations 427
– potential 369

– swelling 491
– volume 491, 497
– – decrease 1
Cell-to-cell channel conductance 54
Cellular 305
– free calcium 164
Central venous pressure 354
Cerebral arteries 216
Cerebrovasculature 216
Channel 469
– conductance 211
– currents 322
– inhibition 37
Charge movements 445
Chemically skinned muscle 231
Chemiosmotic hypothesis 503
Chloride 75
– channel blocker NPPB 1
– channels 641
– conductivity 434
– current 240
– transport 509
Chronic nerve stimulation 86
Ciliary epithelial cells 80
– process 80
Cl conductance 305
Cl conductive pathway 634
Clamp 668
Cl/HCO_3 exchange 29
Cl^-/HCO_3^+ exchange 613
Cl^--HCO_3 Exchange 509
Cl^--sensitive microelectrode 509
Cl-transport, renal 516
Cobalt 469
Cold receptors 188
Collecting 557
– duct 434
Colon 172, 568
– electrophysiology 203
Colonic circular muscle 203
– temperature 141
Commissure strain 647
Concentration clamp technique 240
Contractile activity 86
– properties 314
Contractility 277
Contraction 339
– velocity 455
Contractures 390
Core temperature 402
Coronary flow 618
Countercurrent system 557
Creatine 455
– kinase isoenzyme 417
Crossbridge interaction 659
Cultured central neurones 297
– endothelial cells 654
– kidney cells 164
– principal cell epithelium 434
Current 530
Cyclic activity 188
Cytoplasm 328

D

D600 390
Damage 417
Delivery 427
Denervated frog muscle 22
– mouse muscles 211
Depolarisation 597, 634
Descending control 346
D-glucose 482
D-glucose-6-phosphate 482
3,4-Diaminopyridine 422
DIDS 509, 613
Diabetes 613
Diacylglycerol analogues 462
Dihydroouabain (DHO) 579
Dihydropyridines 597
Diluting segment 331
Disinhibition 346
Distal colon 172
– tubule 331
Dithiothreitol (DTT) 225
Double whole cell patch clamp 54
Duct 557
Duodenal brush border membranes 482

E

Effect 277
EGTA 339
Elasticity of veins 147
Electrogenic, Sodium pump 579
Electrolyte concentrations 305
– gradients 427
Electromechanical coupling 203
Electron 516
– microprobe analysis 305, 427
Electrophysiology 216
Enalapril 574
Endocrine cells 641
Endothelial cells 654
Endothelium cells 469
End-plate current 22
Energetics of tetanus 270
Energy metabolism 86, 665
Energy-rich phosphate 121
Enterocytes 422
Environmental temperature 141
Enzyme activities 86
Epinephrine 75
Epithelia 66
Epithelial cells 80, 422
– transport 541
Evoked responses 12
Excitation-contraction coupling 277
Exercise 113, 128, 336, 417
– exertion 397
– hyperaemia 106
– training 101
Exocrine gland 75
Extracellular potassium 183
– space (ECS) 183
Extraocular muscles 314
Eye muscle 314

F

Fast-twitch skeletal muscle 86
Fatigue 665
Fever 292
Fibroblasts 530
Flow 66
Fluorescent probe indo-1 654
Fluoride 654
Force velocity 524
Forskolin 133
Fumarate 7
Fura-2 164
Furosemide 497, 509

G

Gap junction channels 462
– junctional coupling 54
Glial cells 183
Glomerular haemodynamics 155
Glomeruli 503
Glucose challenge 397
– kinetics 397
– metabolic clearance 397
Glutamine synthesis 7
Glycogen synthesis 101
Glycolytic 86
Golgi-apparatus 503

H

Halothane 17
Harmaline 80
Heart papillary muscle 613
– rate 128, 442, 618
Heat acclimation 354
– production 402
Heavy chains 624
Hemodilution 535
Henle's loop 516
Hepatocytes 334
High energy phosphate utilization 270
Hill coefficient 37
Hodgkin-Huxley parameters 17, 264
Homodimeric heavy chains 624
Human muscle 17
– myoballs 264
– neonates 442
– T cells 133
Hyperpolarisation 451
Hyperthermia 17, 354
Hyperventilation 548
Hypothalamus 141
Hypotonic shock 548
Hypovolemia 574

I

IMP 121
Inactivation 390, 634
Individual distal tubule 427
Indo-1 654
Inductive coils 647
Innervation 524
Inonomycin 164
Inorganic phosphate 482
Inosine 618
Inositol phosphates 382
– triphosphate 253
Inotropic 277
Insulin 258
[^{125}I] Insulin binding 604
Insulin receptors 604
– sensitivity 101
Intermedia cells 641
Intestinal alkaline phosphatase activity 482
Intracellular Ca 382
– Ca^{2+} 75
– calcium 164, calcium 654
– – concentration 503
– electrical activity 203
pH 29, 164, 231, 334, 503, 589, 613
– – regulation 613
– sodium 258

Intravital microscopy 93
Ion channels 297
Ion net fluxes 516
– transport 164
Ion-channel 339
Ionic conductances 434
Ion-selective electrode 509
– microelectrode 613
Ion-sensitive microelectrode 613
Ischaemia, global 618
– graded 618
Isobaric contractions 409
Isolated cardiac myocytes 277
Isometric contractures 390
– exercise 128
– force development 231
– tetani 121
Isotonic tetani 455

J

Juxtaglomerular cells 503

K

K channels 548
K transport 172
K-Contracture 390
K-channels 331
Kidney 7, 66, 491
– altered water intake 42
– adaptation 42
– cells 548
– – (LLC-PK_1) 164
– hypertrophy 42
– proximal tubule 541
– rabbit 363
K^+ accumulation 183
K^+ channel 37, 469
K^+ conductance 133
K^+ current 448, 530
K-transport, renal 516

L

Lacrimal acinar cells 509
– glands 462
Lactate 455
– production 101
– shuttle 397
Lactic acid 113
Lauthanum 469
Leakage of CK-MM 417
Leaky 66
– epithelia 541
Left atrial pressure 535
Leukocytes 93
Leukotrienes 155
Limb movements 548
Liver 334
LLC-PK_1 cells 164
Local anaesthetic 589
Locus coeruleus 346
Low load isobaric contractions 409

M

Magnetoencephalography 12
Malignant hyperthermia 17
Mechanical equivalent of ~P splitting 270,455
– output 121
Medullary collecting duct 557
Membrane activity 382
– current(s) 248, 579
– depolarization 634, 641
– patches 322
– potential 509
Menthol 402
Mesentery microvessel networks 93
Metabolic acidosis 427
– muscle receptor 113
– response 402
Mg^{2+} transport 516
Microcirculation 93
Microdissected glomeruli 604
Microdissection 363
Microelectrodes 172
Microperfusion in vitro 516
Microprobe 516
Microvessel networks 93
Miniature end-plate currents 22
Mitochondria rich cell 305
Mitogenesis 133
Mn^{2+} 225
Mn^{2+}-activation, Smooth muscle 225
Monactin 359, 503
Monosynaptic reflex 346
Monovalent cations 211
Morphometry 42
Motoneuron 346
Motonuclei 346
Multiple conductance states 54
Muscle 22, 101, 106, 270, 417, 665
– cells 382
– contraction 339, 524
– culture 264
– dynamics 314
– fibres 253, 390
– glycogen 336
– metabolism 336
Muscular contraction 113
Myoballs 17, 264
Myocardial oxygen consumption 409
Myocytes 554, 668
Myogenic tone 216
Myosin composition 624
– light chain phosphorylation 225, 231
Myotomal muscle 524

N

Na/H exchange 29
Na^+ 211
Na^+ transport 80
Na^+-Ca^{2+} exchange 277
Na^+-channel density 568
Na^+/H^+ exchange 613
Na^+H^+ exchange 80
Na^+-K^+ exchange pump 258
Na^+-K^+ pump 277
Na^+-K^+-Cl^- co-transport 509
Na-K ATPase 579
Na-transport, renal 516
Necturus renal proximal tubules 369
Nephrectomy 172
Nephron 604
Nephron microdissection 604
Nerve stimulation 86
Neuromuscular junction 258
Neurones of the leech 589
NH_4^+ carrier nonactin/monactin 359
NH_4^+ ion-selective microelectrode 359
Nifedipine 530
Nigericin 503
Nitropropylphenylaminobenzoat 1
N-methyl-D-glucamine 211
Noise analysis 240, 568
Nonactin 359
Noradrenaline 141
Noradrenergic thermoregulatory mechanism 141

O

Octanol 54
Okadaic acid 248
On cultured endocrine cells 641
Ontogenesis 141
Oocyte(s) 451, 579
Organic cations 211
Osmolality 285
Osmotic permeability 66, 541
– work 557
Ouabain 258, 277, 491, 497, 509
– binding in oocytes 579
Ovary cells 54
Oxaloacetate 7
Oxytocin 568

P

Pacemaking activity 203
Pancreatic acinar cells 54
– B-cells 597
Papillary muscle cells 613
Paracellular water 66
– – flow 541
Parotid acinar cells 75
Pars 641
Parturition 292
Parvalbumin 195
Passive elastic properties 147
Patch clamp 322, 328
– technique 54
Patch-clamp 297, 339, 462, 469
P_2 receptors 469
Perhexiline 253
Peritubular membrane potential 369
Permeability to Ca^{2+} 211
8-Phenyltheophylline 618
pH regulation 589
Phorbol dibutyrate 462
Phosphate, high energy 336
– absorption, intestinal 482
– utilization 270
Phosphocreatine 665
Phosphorylation 248
pH-selective micro-electrodes 589
Pigmented ciliary epithelial cells 80
Poly I:Poly C 292
Polyethyleneglycol 574
Portal vein 382
Potassium 1, 172
– apparent transference number 369
– channels 133, 172, 331
– conductance 334
– contractures 390
– transport 422
Pregnancy 292, 624
Pressure release in relaxation 409

X

Pressure-dependent sensitivity 216
Prestretch 147
Principal cell epithelium 434
Procaine 589
Protein kinase C 462
– phosphatase inhibitor 248
Proximal tubule 1, 66
Pulmonary ventilation 548
Pyrophosphate gels 624
Pyruvate carboxylation 7

Q

Quinidine 80
Quinine 422

R

Rapidly-cycling bridges 659
^{86}Rb as tracer for K^+ 422
Recurrent inhibition 346
Reflection coefficients 557
Relaxation 195, 231, 409
Renal blood flow 155
– cell culture 164
– collecting duct 434
– cortical tubules 7
– distal sodium 427
– insufficiency 172
– medulla 42, 557
– proximal tubule 369
– straight proximal tubules 1
– tubule cells 427
Renin 574
– release 503
Renshaw cell 346
Respiration 442
Retzius neurones of the leech 589
Run-down 328
Ryanodine 376

S

Salivary 75
Saralasin 574
Schwann-cell 22
Sculpin fibres 524
Secretion 75
Serotonin 216
Shortening, speed of 455
Single aortic cell 448
Single Ca^{2+} channel 597
– channel current(s) 322, 568
– fibers 195
– ventricular myocytes 668
Sinus arrhythmia 442
Size of extracellular space 183
Skeletal muscle 17, 121, 195, 264, 445, 665
– – fibres 253
Skin temperature 402
Skinned frog skeletal muscle fibres 253
– smooth muscle cells 225
– vascular smooth muscle 231
"Sleeve technique" 322
Slow wave propagation 203
Slowly-cycling bridges 659
Small intestine 422
Smooth muscle 203, 231, 339, 376, 624, 659
Smooth muscle cells 29, 225, 382
Sodium channel(s) 17, 172, 264
– chloride permeability 557
– currents 264
– dodecyl sulphate (SDS) 624
Solvent drag 541
Sound location 12
Spinal cord 186, 346
Stopped-flow quenching 195
Streptozotocin 613
Stretch-activated channel 339
Stretch-induced contraction 339
Systems analysis 314

T

T cells 133
Tachycardia 128
Taenia caecum 376
Teleost fish 524
Temperature 195
– control 322
– regulation 402
Tension maintenance 270
Tetani 195
Tetanus 270
Tetraethylammonium 183, 203
Tetrodotoxin (TTX) 258, 264
Thermal adaptation 285
Thermoreceptors 188
Thermoregulation 188
Thermoregulatory mechanism 141
Thick ascending limb 42, 491, 497
Thirst 574
Thrombin 668
Thyroid hormone deficiency 336
Thyroidectomy 336
Tissue culture 80, 434
– extract 328
Toad skin epithelium 305
Tracheal muscle 659
Training 397
Transcellular permeability 66
Transducer processes 188
Transepithelial ion net fluxes 516
– membrane potential 369
Transmembrane electrolyte gradients 427
Transmural pressure 216
Transport 172
– regulation 634
Trifluoperazine 253
Tubules, renal 363
Twitches 195

U

Urea 557
– permeability 557
Urine concentrating mechanism 557
– concentration 42
Uterus 624

V

Vampire bats 188
Vascular compliance 354
– smooth muscle 231, 448
– – – cells 29
Vasoactive intestinal peptide 363
Vasopressin 292
– antagonist 155
Vena cava 147
Ventricular cells 668
– myocytes 37, 277
– oxygen consumption 409
Verapamil 422, 530
Voltage clamp 448, 579
Voltage-gated K^+ conductance 133
Volume expansion 409
– load 535
– regulation 491, 497

W

Warm receptors 188
Water balance 285
– intake 42
– – in hypovolemia 574
– transport 66
Whole cell voltage 668
– – patch clamp 530
– – patch-clamp 17
Work performance 455
– production 270
